Experience

- **.NET Developer in Risco Software**

August 2017 – Now (4 years 1 month)

- ERA (Register of Shareholders)
 - In Risco Software I am responsible for creating applications for financial institutions. The project I am currently working on is an online platform where the shareholder can buy, sell and manage stocks.
 - I mainly worked on creating a Web API for client applications in Angular 11 and creating a backend and frontend for an internal broker application. The project has a DDD structure and used the following databases: PostgreSQL and Oracle.
- Cesarz MIFIR, Cesarz Best Executions, Cesarz SFTR
 - All of these projects come from the financial industry. These are modules of the Cesarz system has been designed to fulfil the requirements of the MiFID II/MiFIR regulations, which extend the obligation to report financial market transactions to the Polish Financial Supervision Authority.
 - I was responsible for creating graphical interfaces based on Telerik UI and creating business logic for these applications written in .NET with Entity Framework and Microsoft SQL and Oracle databases. I also made prototypes for several views for these applications, using the Balsamiq Wireframes tool.
- Risco Vac
 - It is an internal web application for holiday management and remote work for our company. I was involved in creating views based on Angular and business logic written in .NET with Entity Framework and Microsoft SQL database.

- **.NET intern in Accenture Poland**

April 2017 – July 2017 (5 months)

- I worked in mobile team. We were working on creating web services for mobile applications and creating different small sub applications for this project. It was a big project for the financial industry which consisted of a web application and two mobile applications for the Android and IOS platforms.
- **Tech stack:** WPF, WinForms, JQuery, JavaScript, AngularJS, Bootstrap, HTML5, CSS3, Entity Framework, Microsoft SQL Server, Oracle Database, ASP.NET Web Services, Razor.

- **Frontend intern in Accenture Poland**

December 2016 – March 2017 (4 months)

- I worked on creating a responsive website with Christmas promotions for one of the most popular mobile operators in Poland.
- **Tech stack:** HTML5, CSS3, Bootstrap, Bower, JavaScript, JQuery, MySQL.
